

Strategy, Planning and Budgeting Readiness Report

This report was dynamically generated from your responses to the CapabilitySource SBP Readiness Calculator. This report includes personalized findings and recommendations about your organization's level of alignment and agility in strategy, planning and budgeting. Use information in this report to understand the strengths and weaknesses in your current strategy development, planning and budgeting processes and create a plan to improve them using modern business capabilities and technology.

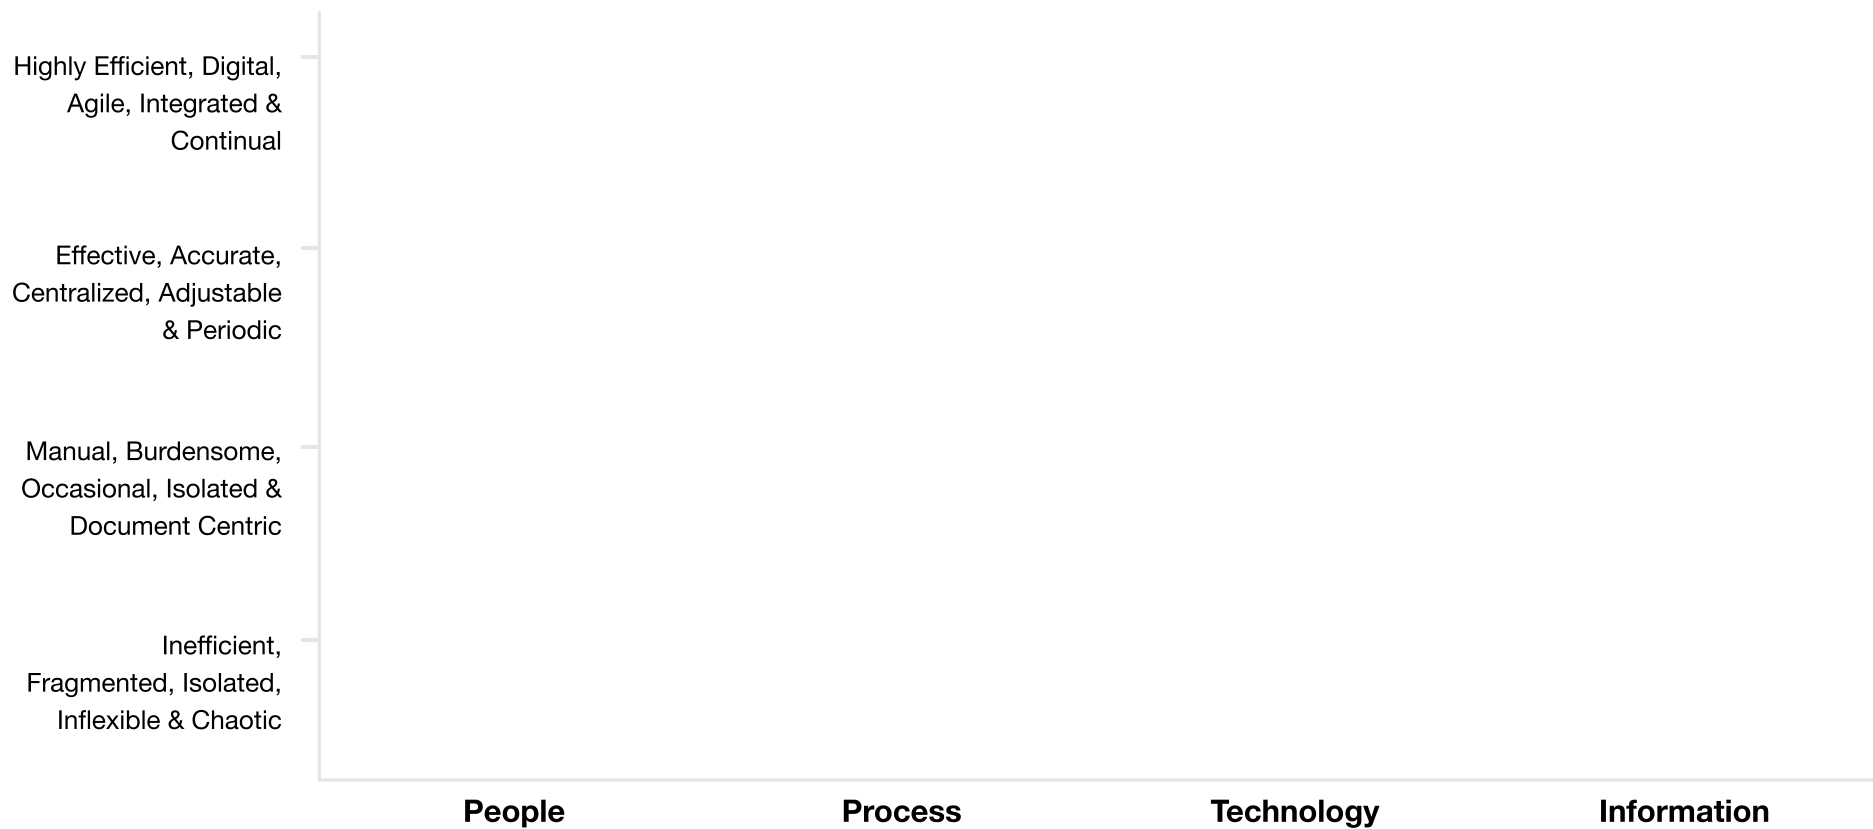

Strategy, Planning and Budgeting (SPB) Readiness Calculator Foundations

The SPB Calculator uses 24 simple questions related to people, process, technology and information. Responses are rated as Ad Hoc, Basic, Managed and Optimized. SPB Calculator readiness ratings have been established using real customer experiences, research and analyst consultation. The ratings in this report provide a benchmark perspective. Use the SPB Calculator and this report to determine understanding and alignment across your organization, develop an SPB improvement journey and rate your progress along the way.

Next Steps

- Analyze results that surprise you and determine the root causes of poor performance.
- Share this report with colleagues, and ask them to take the assessment and evaluate rating discrepancies across teams and organizations.
- Determine your desired level of readiness and consider both the costs and benefits of achieving it.
- Get started by picking one of the four dimensions (people, process, technology and information) and create a tactical plan to improve it.
